

CS303 - Honey Bee Dance Language Translator App

Status Report

Date: November 22, 2020

1) Project Members:

- *Paul Cochran*
- *Christopher Flippen*
- *Chelsea Greco*
- *Vinit Patel*

2) Accomplishments for the week -- and which team members participated/contributed

- *On November 16, we met as a group to discuss the storyboards we made during the past week. An important part of this meeting was discussing the role that AI would have in the app. Previously, we had planned to have AI as a central component of the app, but after Vinit and Christopher researched it more, it appears that machine learning won't be a main focus and that image analysis will be important instead.*
- *Jeremy and Elli were unable to meet with us this week.*
- *Professor Dahlberg was unable to attend our planned November 19 meeting, so we met with him on November 20 instead. One main goal of this meeting was to discuss how our plan for the project has changed regarding how AI will be used. During this meeting, we also discussed plans for working on the project over winter break.*

3) List of Milestones to be completed and anticipated date (indicate which ones are in danger of not being met)

- *On November 23, we will meet as a group to write an email to Jeremy explaining some of our plans for the project and a copy of our design document.*
 - *Once we have sent this email, our schedule for continuing the project will depend on when Jeremy responds.*
- *We will not have a Thursday meeting next week due to it being Thanksgiving as well as the beginning of fall final exams.*

4) List of issues, problems, or concern(s)

- *There don't seem to be any issues currently*
